*Allowable Subject Matter*

I. The following is an examiner's statement of reasons for allowance:

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Numminen et al. disclose a method for testing the functioning of a digital radio apparatus, which method is also suitable for testing the functioning of data communication arrangements which have asymmetric capacities or are unidirectional. Another object of the invention is that the method according to the invention can also be utilized in conjunction with the normal use of the digital radio apparatus.

Vambaris et al. disclose a monitoring arrangement including a processor to control a transceiver capable of initiating an upstream test call to at least one predetermined number on an uplink via a BTS under test, the predetermined number accessing first tone generator means arranged to transmit a first tone signal via a downlink corresponding to said uplink to the transceiver, first monitor means to detect reception of the first tone signal and to inform the processor of reception of the first tone signal, the processor recording an error when the first tone signal is not received in response to the initiation of a call. The processor causes a record of the test results to be stored in a memory.

Knippelmeir disclose a test set, located within a cell site (fixed or mobile), which is programmed to monitor voice channels by calling a responder connected to the switch of the MTSO serving the cell.

Price et al. disclose a system for testing a radio paging system and, in particular, relates to a transmitter test module and a mobile test bed which generate error, message completion, range, and similar paging test information for a number of transmitting radio stations and for a variety of test sites.

Therefore, all of the above prior art fails to disclose a test host to cause a first communication device to send a first test signal into a communications channel.

Claim 13 is cancelled.

Claims 1-12 & 14-23 are allowed based on Selig et al. (US 5764726) in view of Nakamura [US 5943617].

II. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
